A transportation service is provided for them which consists of 2 - 3 autopullmen and other Soviet military motor vehicles which leave PLOESTI at 0700 in the morning and return at 1800 in the evening.

## B) Economic Information

## a) Industries

## Petroleum industry

## Nationalization

Nationalization of the refineries and petroleum fields in the PLOESTI basin <sup>has carried out</sup> ~~started~~ in 1946. During this year, the "CONCORDIA" company with its "VEGA" refinery and petroleum fields, the "CREDIT MINIER" with its "BRATI" refinery and petroleum fields and the "STANDARD" refinery had been merged into the Soviet-Rumanian SOVROMPETROL company.

The refineries and remaining petroleum fields- which <sup>below</sup> ~~are discussed in the following~~ - were united at the same time in the Rumanian organization "PETROLIFERA MUNTENIA" and then, in October - November 1950, merged into the "SOVROMPETROL".

## Note:

[redacted] possibility that some 50X1-HUM of the data with regard to nationalization might be incorrect.

National ~~production~~

National ~~production~~ amounts to 15,000 - 16,000 50X1-HUM tons per day.

**SECRET****U. S. OFFICIALS ONLY**

**SECRET****UNEDITED ROUGH DRAFT****U. S. OFFICIALS ONLY**

The information with regard to the production of the MOLDOVA (known as national ~~ized~~ reserve basin) basin which amounts to 1200 - 1300 tons daily is based on similar facts.

General information about the petroleum basin of MOLDAVA

The intense exploitation by the "SOVROMPETROL" of the ~~national~~ Rumanian national reserve basin began in 1949-1950, *since it constitutes* ↓

In this locality is only one refinery, that of MOINESTI (79-80/31-1) which sends the crude oil surplus to PLOESTI via railroad to process the surplus in the refineries of PLOESTI.

50X1-HUM

Management of "SOVROMPETROL"

50X1-HUM

General management of "SOVROMPETROL" located in a 5-6 story building (entirely occupied) on former BRATIANU street, immediately adjacent to the university.

BUCURESTI

50X1-HUM

The director general is a Russian, assisted by a Rumanian political director.

The most important and responsible positions are occupied by Soviet personnel.

Main office of the technical management of

PLOESTI

"SOVROMPETROL" for the refineries and the petroleum fields of the basin at the locality indicated in the margin. It is located on DILIGENTESI street, in the center of the residential area.

## Refineries of the petroleum basin of PLOESTI

50X1-HUM

Refinery, formerly "ASTRA ROMANA", now PLOESTI  
called "SOVROMPETROL No 1", located in the  
outskirts south of the city, west of the Bucarest-  
Ploesti railroad line and south of the Buzau -

[ ] Ploesti railroad line.

50X1-HUM

The compound is surrounded by a wooden enclosure,  
about 300 x 300 meters.

With regard to the refinery in question, [ ]

50X1-HUM

[ ] location and capacity of the

50X1-HUM

tanks in this compound [ ] are as follows:

50X1-HUM

- sector in the extreme east of the refinery: <sup>about</sup> 20 tanks  
each  
of various sizes/with a capacity which ranges from  
1000 to 5000 tons, for crude oil.

- sector in the extreme west of the refinery: about 30  
tanks for processed products, with a capacity of  
500 to 1000 tons each.

- sector in the <sup>central</sup> north of the refinery: about  
each  
10 tanks for processed products, with a capacity of  
1000 - 2000 tons.

- outside of the enclosure, 100 meters south of the south-  
western side of the same: 2 tanks, each with a capacity

**SECRET****- 4 U. S. OFFICIALS ONLY**

**SECRET**

UNEDITED ROUGH DRAFT ONLY

**U. S. OFFICIALS ONLY**

of 10,000 tons. They are approximately 10-12 meters high and 30 - 35 meters in diameter.

- outside of the enclosure, immediately west:

6 tanks for crude oil. Their capacity varies between 3000 and 10,000 tons each.

Workers: about 1500. The personnel directly engaged in production works in 3 shifts. The remainder works in 1 or 2 shifts according to need.

Political director: A Russian

Technical director: Engineer STEFANESCU ALESSANDRO,

[REDACTED]

50X1-HUM

Production: [REDACTED] the 1948 production was 3000 - 4000 tons daily. [REDACTED] the present production is the same.

[REDACTED]

Refinery, formerly "ROMANA AMERICANA", located 500 - 600 meters north of the Buzau

PLOESTI  
50X1-HUM

[REDACTED]

Ploesti railroad line, about 5 km east of the city indicated in the margin.

50X1-HUM

Occupies an area of about 600 x 400 meters.

Workers: about 1500 in 3 shifts (for personnel directly engaged in production)

Production:

- maximum capacity of the refinery: 4000 tons per day
- present production: 2500 - 3000 tons per day

Tanks:

- sector in the extreme west of the refinery: 12-15 tanks of various sizes, with a capacity from 2500 to 5000 tons. Crude oil is stored here.

**SECRET****U. S. OFFICIALS ONLY** 5 -

**SECRET****UNEDITED ROUGH DRAFT ONLY****U. S. OFFICIALS ONLY**

- section in the center of the refinery: about 10 tanks for finished products, with a capacity between 1000 and 2000 tons each.

50X1-HUM

- Refinery, formerly "VEGA", located 100 meters PLOESTI east of the Valeni  railroad line, 50X1-HUM 300 meters north of the railroad station of the north. Occupies an area of about 800 x 500 meters. Workers: about 2000 in 3 shifts (for the personnel engaged in production)

**Production:**

- maximum capacity of the refinery: 4000 - 5000 tons daily
- present production: 2000 - 4000 tons daily

**Tanks**

- <sup>northern</sup> sector ~~of~~ of the refinery: about 20 tanks for crude oil and processed products. Their capacity is from 2000 to 6000 tons.

January 1951

Refinery, formerly "STANDARD", located in the PLOESTI outskirts of the city, 500 meters south of the railroad station of the south.

The compound is surrounded by a wooden enclosure of about 500 x 300 meters.

Workers: about 1000 in 3 shifts (for personnel directly engaged in production)

**Production**

- maximum capacity: 3000 tons daily
- present production: 1000 - 1500 tons daily

## Production

- maximum capacity: 3000 tons daily
- present production: 1000 - 1500 tons daily

50X1-HUM

Refinery, formerly "UNIREA", located in the  
outskirts, south of the city, 200 meters south of the  
railroad line to BUZAU

PLOESTI

The compound is not operating since 1948.

50X1-HUM

It will resume its activities in December 1951

Occupies a terrain of about 500 x 500 meters

Workers: 200 - 300 engaged in putting the compound  
back in operation.

Refinery, former "XENIA", located in the outskirts  
~~central~~ north of the locality indicated in the margin

50X1-HUM

"

The compound suspended its activities in 1948 in order  
to be able to concentrate the production efforts in  
the larger plants.

The area occupied by the refinery is about 500 x 400 meters.

The production capacity is about 1000 tons per day.

Refinery, formerly "RUAT", located 200 - 300 meters south  
of the former "ASTRE ROMANA", previously mentioned.

Constructed by the "ASTRA ROMANA" company before and after  
the second world war.

The equipment of this plant seems to have been shipped to the  
USSR in 1946,

At present <sup>equipped with all machinery</sup> ~~used by the company~~ without being put <sup>back</sup> into operation.

Petroleum fields in the PLOESTI basin

50X1-HUM

**SECRET****U. S. OFFICIALS ONLY**

**SECRET**  
**U. S. OFFICIALS ONLY**

UNEDITED ROUGH DRAFT ONLY

50X1-HUM

BERCA petroleum field, located 22 km north-northwest of BUZAU

BERCA

The field is located north of the residential area and comprises an area of about 5 km (direction, west-east) x 2 km.

50X1-HUM

Comprises at the date indicated in the margin, about 30 wells with a production of 350 tons per day.

The oil is almost entirely exploited, since the oil is extracted ~~The field is equipped with pumps for the extraction~~ by pumps.

~~SECRET~~

50X1-HUM

ARBANASI petroleum field, located <sup>north of</sup> 5 km <sup>city</sup> ~~SS~~ the preceding one.

ARBANASI

It extends 15 km north of the locality indicated in the margin and comprises an area of about 5x3 km.

50X1-HUM

There are at present about 20 wells in operation and most of the petroleum is extracted by pumps; thus almost an entirely exploited oil field.

Recently drillings were carried out, but none of them have been successful.

The production of the field is limited; it amounts to only 20-30 tons per day.

SARATA - MONTEORU petroleum field, located 12-13 km west of BUZAU and 6 km north of the PLOESTI - BUZAU railroad line. The ~~field~~ <sup>on northern</sup> is located ~~at~~ the slope ~~of~~ of the MONTEORU mountain (named after the locality)

MONTEORU

50X1-HUM

50X1-HUM

There are 2 wells with galleries; ~~where~~ the extraction of the oil is performed by pumps.

**SECRET**

**U. S. OFFICIALS ONLY**

**SECRET**

UNEDITED ROUGH DRAFT ONLY

**U. S. OFFICIALS ONLY**

The production amounts to about 50-60 tons per day.

50X1-HUM

URLATI petroleum field, located north of the ~~city~~ <sup>city</sup> ~~about~~  
 about  
 Comprises an area of 10 km (direction, west-east)  
 x 2 km .

URLATI

50X1-HUM

At present, there are about 100 wells in operation  
 with a production of 800 - 900 tons per day.

The extraction of the oil takes place by spontaneous  
 eruption (wells started to ~~run~~ operate recently), ~~by~~  
~~means of~~ a gas lift and pumps.

the oil field is almost entirely  
 exploited.

~~extends over~~  
 BOLDESTI oil field ~~comprises~~ the locality indicated  
 in the margin.

BOLDESTI

It comprises an area of 10 km (direction, west-east)  
 x 3 km (direction, north-south)

50X1-HUM

50X1-HUM

50X1-HUM

There are about 80 wells in operation and the extraction  
 takes place by spontaneous eruption, ~~means of~~ a  
 gas lift and pumps.

Production: 600 - 700 tons daily.

BAICOI - TINTEA petroleum field extends 15 km  
 west-east and 5 km north-south.

BAICOI

Comprises about 100 wells and the extraction takes  
<sup>by the 3 methods</sup>  
 place ~~as~~ mentioned before.

Production: 1000 tons daily.

50X1-HUM

50X1-HUM

MORENI petroleum field

MORENI

50X1-HUM

Occupies an area which extends about 15 km  
 west-east and about 5 km north-south.

Comprises about 100 wells; production, 800 - 900  
 tons daily.

50X1-HUM

**SECRET****U. S. OFFICIALS ONLY**

**SECRET**  
**U. S. OFFICIALS ONLY**

UNEDITED ROUGH DRAFT ONLY

by the 3 methods mentioned before.  
 The extraction takes place ~~at the existing~~ ~~and~~.

GURA OCNITEI petroleum field, (<sup>city</sup> located about  
 10 km east of TARGOVISTE)

50X1-HUM

GURA OCNITEI

It comprises only the wells of RASVADU and  
 OCHIURE with a total area of 10 km (west-east)  
 and 3-4 km (north-south)

50X1-HUM

There are about hundred wells in operation. The  
 by the 3 methods  
 extraction takes place/ mentioned before.

The production amounts to about 500 - 600 tons daily.

50X1-HUM

TARGOVISTE petroleum field, extends immediately

50X1-HUM

TARGOVISTE

north-east of ~~of~~ the ~~town~~ <sup>is</sup> <sup>(along the)</sup> 5 km north-south <sup>direction</sup> ~~and~~  
 2 km. ~~whole~~.

50X1-HUM

Comprises about 100 wells; production, 1200 tons  
 per day. All three ~~extraction~~ methods mentioned  
 before are used here.

50X1-HUM

SUTA SEAGA petroleum field, (<sup>city</sup> located 15 km  
 south of TARGOVISTE)

SUTA SEAGA

This field was discovered in 1950 by the Russians  
 and at present, about 40 wells, all with spontaneous  
 eruptions, are in operation.

50X1-HUM

The area comprises about 3 x 3 km; production, 1300  
 tons per day.

This basin seems to be almost exploited as a result  
 of the  
 of a fire which broke out in one/mine about the middle  
 of February 1951 and ~~again in March~~ was still raging on 14  
 March

50X1-HUM

Oil production amounts to about 60-70 tons per day and the  
 production of gas to about one million cubic meters per day.

**Distribution station**

A distribution station for processed products, PLOESTI  
called "TELEAJEN" is located 5 km east of the locality  
indicated in the margin, south of the BUZAU [ ] railroad  
line. 50X1-HUM 50X1-HUM

From this distribution station the processed products  
of the PLOESTI refinery<sup>ies</sup> are distributed via 8-inch  
pipe lines to RENI [ ], to CONSTANTIA [ ] 50X1-HUM  
and to GIURGIU [ ]

The station comprises an area of about 400 x 200 meters  
and is equipped with 20 tanks with a capacity of about  
1000 to 2500 tons each.

includes  
It ~~consists~~ 3-4 small seized buildings for offices and  
quarters of the station's personnel. These buildings  
are located in the sector east of the station.

50X1-HUM

**Pumping station**

50X1-HUM

Pumping station located 100 meters south of  
the PLOESTI - BUZAU [ ] railroad line.

INOTESTI

This station is pumping the crude oil from the  
petroleum fields of the <sup>eastern</sup> sector ~~west~~ of the PLOESTI  
basin to the refinery<sup>ies</sup> of the locality mentioned before.

50X1-HUM

50X1-HUM

It is connected with the BERCA, ARBANASI, MONTEORU,  
oil fields by <sup>a</sup> 6-inch pipe line~~x~~ and with the refinery<sup>ies</sup>  
of PLOESTI with a 7-inch pipe line (see enclosure No 2).

It comprises:

- 1 tank; capacity, 5000 tons
- 2 tanks; " 2000 "
- 1 tank; " 1000 "

## C) Political Information

## a) Miscellaneous

Political sentiments and morale of the workers at the

~~uniformed~~ <sup>low wages</sup> ~~basin~~ of PLOESTI coal basin.

The ~~bad economic~~ <sup>the</sup> treatment, the constant political PLOESTI  
the pressure and pressure by the union<sup>s</sup> has not been 50X1-HUM

without any influence on the political<sup>sentiment</sup> and morale

of the workers. Those workers are by ~~the~~ and large

the same who~~x~~ in other times <sup>received</sup> had a different economic

treatment which permitted them to save and look calmly

forward to old age. In reality, the promises of social

reforms which would bring great improvements to ~~the~~ living conditions

~~in~~ the country betrayed the workers' ~~in their~~ good faith.

The union meetings which they spontaneously attended at the beginning, have shown the real character of Communism which was imposed upon them.

Aside from other reasons which might be involved, the workers of today hate Communism also for the following simple reasons: The improvements with regard to a way of living promised to them were not kept and the conditions became much worse; for what reason should they continue to adhere to Communism? it is better to stay away and hope for a <sup>new</sup> conflict which will solve these problems.

non-  
Dismissals of workers of/Rumanian nationality

50X1-HUM

The Soviet-Rumanian company "SOVRONPETROL" dismissed recently 4 non-Rumanian workers who held <sup>fairly</sup> responsible positions. These dismissals took place according to article 20 <sup>section</sup> b of the collective labor agreement which provides for the dismissal of workers because of decreased <sup>work</sup> ~~labor~~ ~~activities~~.
